

Technical Bulletin

Satin Moisture-Cured Urethane # 1100

Product Description

A one-component, Moisture Cured Polyurethane Coating/Primer. Has excellent adhesion to sound, properly prepared steel, and surfaces. This low viscosity, high "wetting" coating undergoes a rapid molecular weight change as it polymerizes into a high molecular weight finish which provides excellent corrosion resistance and abrasion resistance.

Physical Properties

Form.....Liquid
Color.....Light Yellow
Odor.....Slight
Boiling Range.....Decomposition
Specific Gravity.....1.15
Solubility in H₂O.....Insoluble
FlashPoint.....365°F

Applications

Metal, steel, concrete, wood, fiberglass, plastic, clean or weathered galvanized metal.

Areas of Use

Municipalities, Agricultural, Dairy, Industrial, etc.
